XAMARIN Program@Miele Brasov

About the job

Following one year learning program – Xamarin Induction Program (XIP) you can become a **Junior Mobile Application Developer.**

In this position, you will have the opportunity to learn, to be mentored and work on top-of-the-range next generation products in an international environment.

Last, but not least, at the end of this program you will be ready to be a part of Mobile Application team to develop using state-of-the-art tools and work together with other developers to create the interactive Miele@Mobile App.

What do we expect from you?

- Bachelor or Master (preferable) degree in Computer Science, Information/Media Technology or a related field;
- A good knowledge in a OOP language (preferable C#) and a strong base regarding OOP principles;
- We would appreciate any other OOP or mobile development language knowledge;
- Knowledge of data types and variable, logic and conditionals, methods, arrays and loops;
- To be eager and motivated to learn;
- To be proactive and self-taught by core;
- To be curious, express all your uncertainties or any other topics that might come along the way
- Good communication is the key.

What will you do?

- You will learn and will be mentored in Xamarin.Forms;
- You will dive in our code base and have the possibility to improve your programming abilities by tackling small tasks;
- You will take part in our team's ceremonies using the Agile and Scrum methodology;
- You will create, maintain and test your written code;
- At the end of the program you will write code for apps on both iOS and Android platforms.

What will you achieve?

- Will be mentored in your journey by a skilled and experienced trainer;
- You will have the opportunity to enhance your coding skills in an experienced software development team;
- To be guided in both your professional and personal development path by our experienced trainer and software developers;
- You will gain experience in a real working environment and have an input in a worldwide application
- You will be able to apply coding style guides on a professional level together with Mobile Application team.

Miele Tehnica is a subsidiary of Miele & Cie. KG, Germany. We produce electronic components for a wide range of Miele appliances, such as washing machines, tumble dryers, vacuum cleaners, ovens and others. The products Miele offers to its customers set the standards for durability, performance, ease of use, energy efficiency, design and service.

If you are looking for a long-term career and want to join a best in class career where your talents are appreciated, then we would love you to join our team!
