

Study program: **Industrial Design**

**The topic for the written exam**  
**- *Product Design and Development* -**

1. Product development
  - 1.1. Stages of product development
  - 1.2. Conceptual analysis and synthesis of a product
  - 1.3. Embodiment solutions for assemblies and guiding elements in rotational movement
  - 1.4. Modelling and simulation of mechanical systems
    - 1.4.1. Virtual prototyping process: stages, scheme
    - 1.4.2. Simulation of mechanical systems: types of analysis, flowchart
2. Colour, shape, aesthetics and ergonomics, form-giving in design
  - 2.1. The visual perception: Balance as a design principle; types of visual balance.
  - 2.2. The subtraction of the colours
  - 2.3. Relations between the colour and shape
  - 2.4. Functional analysis method used in defining the design specification - example
  - 2.5. Ergonomics. Anthropometry and the active space design.
  - 2.6. The direct and indirect methods for the study of the shape, using drawings and design models
